Case Study: RIS3 Greater Manchester

MAPS-LED First Mid-term Meeting 06/07.06.2016 Northeastern University, Boston, MA, USA

Multidisciplinary Approach to Plan Smart Specialisation Strategies for Local Economic Development

About Greater Manchester (GM): Demographics

- Population of 2.7 million
- Dynamic entrepreneurial & business base in Manchester
- Poor health, inequality, high unemployment, homelessness, pockets of economic & social deprivation

About Greater Manchester (GM): Governance

- Ten local-authority areas, designated a city-region in 2011
- GM Combined Authority established 2011 responsible for economic development, regeneration, transport
- Key Players: GM Local Enterprise Partnership, 4 x
 Universities, Manchester Growth Company 'the family', Transport for Grater Manchester (TfGM)

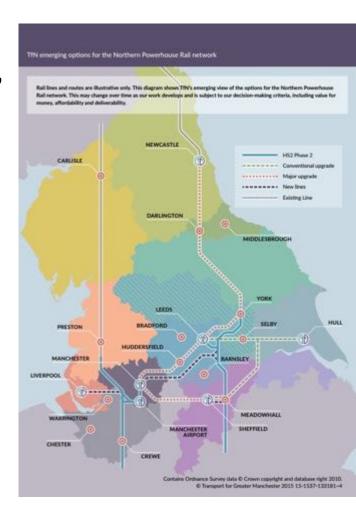

Multidisciplinary Approach to Plan Smart Specialisation Strategies for Local Economic Development

Political Context Devolution & 'Northern Powerhouse'

- GM at forefront of devolution agenda (and the 'Northern Powerhouse')
- New Mayor for GM will be elected in May 2017
- Deal includes new powers over transport, education and £6bn public health budget

Multidisciplinary Approach to Plan Smart Specialisation Strategies for Local Economic Development

Strategic Context

STRONGER TOGETHER

The Greater Manchester Strategy, refreshed 2013 (runs to 2020)

- Underpinned by Manchester Independent Economic Review MIER (2009)
- A refreshed MIER is in development (focussing on social economy)
- Complemented by Growth and Reform plan (2014)
- Connected to key EU strategies eg. ESIF

Multidisciplinary Approach to Plan Smart Specialisation Strategies for Local Economic Development

Greater Manchester RIS3 Background & Application

Local Enterprise Partnership vision: 'By 2020 Greater Manchester will be renowned as a successful commercial science city'

RIS3
Developed and presented 2013

Science Review/Audit, Strategy & Action Plan

Embedded within the GM Strategy 2013 and other key strategies

MAPS-LED First Mid-term Meeting 06/07.06.2016 Northeastern University, Boston, MA, USA

Multidisciplinary Approach to Plan Smart Specialisation Strategies for Local Economic Development

Greater Manchester RIS3: key points

- Science strengths evaluated in terms of Connectedness,
 Embeddedness, Relatedness, Commercialisation potential
- Advanced Manufacturing (Graphene) and e-Health
- Strengths in Digital & Creative, Financial Services, Education

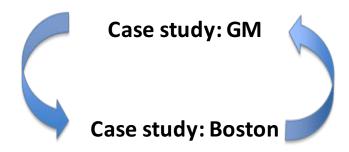

GM RIS3 Case Study - preparatory investigation

- Framework tested on GM pilot
- Framework developed through:
 - Lit review and desk-based research
 - Fieldwork interviews, including key public sector, university and private sector stakeholders, and leads for advanced manufacturing & e-health
- A dynamic model of comparative case study:

Multidisciplinary Approach to Plan Smart Specialisation Strategies for Local Economic Development

GM RIS3 Preliminary findings: Assets

- GM: Not ex-ante conditionality. Driven by good practice
 - Process of self-discovery and genuine learning
 - Continuity not consultancy not one size fits all
 - Idiosyncratic of the GM culture cultural, strategic and political fit
- 'Fuzzy boundaries' approach to entrepreneurial discovery (regional, national and international)
- Demonstrable resonance with heritage, identity & place
- Embedded in strategy enabling broad application

Multidisciplinary Approach to Plan Smart Specialisation Strategies for Local Economic Development

GM RIS3 Preliminary findings: Challenges (1)

National governance challenges

Conflict with the formalized (ex ante conditionality) top down
 RIS3 England strategy (12 general a-spatial sectors)

Internal governance challenges

- Limited participation beyond key public sector actors
- Lack of engagement with GM business base (particularly SMEs/startups)
- Designed to meet a pre-conceived agenda (LEP)
- Early adopters pre-dating place-based approach

Multidisciplinary Approach to Plan Smart Specialisation Strategies for Local Economic Development

GM RIS3 Preliminary findings: Challenges (2)

Spatial challenges

Local impact centred on 'The Corridor'

Implementation challenges

KETS have enabled, but have not been disruptive or transformative

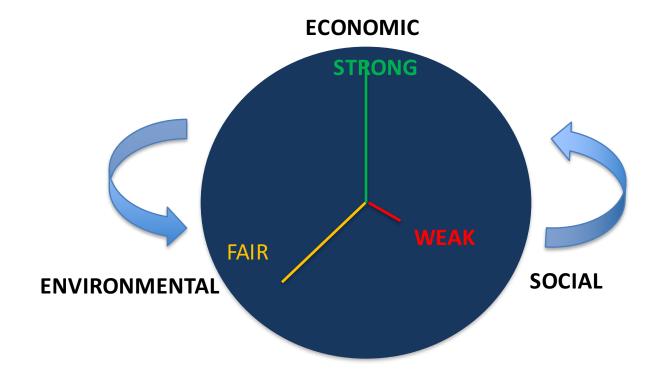

Multidisciplinary Approach to Plan Smart Specialisation Strategies for Local Economic Development

Initial Assessment

Next Steps

- Scoping phase
- Further develop and refine assessment metrics and framework (as new SuROI evaluation tool)
- Apply new evaluation tool to the case studies
- Exploring the 'how' what is the catalyst for success?

Multidisciplinary Approach to Plan Smart Specialisation Strategies for Local Economic Development

EXPLORING THE "HOW": preliminary lessons (from Boston to Manchester)

Key lesson learned: Innovation centres can catalyse innovation (well designed & driven by private sector, not public-sector led) Pre-feasibility analysis: informal interviews with CIC managers and potential stakeholders in Manchester

TANGIBLE RESEARCH OUTCOME ALREADY IN PROGRESS
